HoodBoy Entertainment — DistriBeats Testing Guide

Complete Click-by-Click & Field-by-Field Walkthrough (TEST Mode Integration)

TEST MODE ONLY (db_test_)

1. Pre-Flight Verification (Confirm TEST Mode Is Active)

Click 1: Log in to your dashboard (https://hbe.lol) as System Administrator (Admin).

Click 2: In the left sidebar under CATALOG, click "Distribution".

Verify 1: Next to the page title "Distribution", verify the amber badge reads: "TEST MODE (db_test_)".

Verify 2: In the top-right corner of the Distribution page, verify the two green status pills read: "Live Socket" and "DistriBeats connected (TEST)".

Note: Because your server uses a db_test_ API key, every release you submit in this guide is sent to your DistriBeats Sandbox/Test environment. No real stores (Spotify, Apple Music, etc.) will receive live audio, and live keys (db_live_) are automatically blocked by server policy.

2. Ready-to-Use Test Assets (Generated in Your Project)

DistriBeats enforces strict media rules: Cover art must be JPG or PNG in RGB color space at exactly 3000x3000 pixels, and audio must be WAV or FLAC (MP3, M4A, and AIFF are rejected). Two valid test files have been generated for you in your project folder:

Asset Type	File Path in Workspace	Specification
Cover Artwork	test-assets/sample-cover-3000x3000.png	PNG, RGB color space, 3000 x 3000 px
Master Audio	test-assets/sample-track.wav	WAV (RIFF/WAVE PCM), 44.1 kHz, 16-bit Stereo

3. Prerequisite: Ensure You Have at Least 1 Artist

Click 1: In the left sidebar under CATALOG, click "Artists".

Click 2: If no artist exists yet, click "+ Add Artist", enter Stage Name: "Aarav Sen" (and Legal Name: "Aarav Sen"), then click "Save".

Optional: Under "Music Catalog" (Songs), if you have a song saved, you can test the 1-click "Prefill from Catalog" button in the Distribution form.

4. Scenario A — Create & Submit a Valid Original Single (Every Click & Field)

Click 1: Go to "Distribution" in the left sidebar.

Click 2: Click the purple "+ New Release" button (top right) or the "New Release" tab.

Optional: To prefill from an existing song: select a song in the "Import track from Music Catalog..." dropdown (top right of form) and click "Prefill from Catalog".

Fill out Section 1: "1. RELEASE METADATA & RIGHTS" with these exact test values:

Form Field Label	What to Enter / Select	Validation Rule Tested
Release title *	Midnight Horizon	Required (<=120 chars). Auto-syncs Track 1 title for Singles.
Primary artist *	Select your artist (e.g. Aarav Sen)	Required. Links release to Artist record.
Release type *	Single	From GET /catalogue (Single, EP, Album).
Genre (DistriBeats catalogue) *	Electronic	Loaded live from GET /catalogue (122 genres).
Sub-genre (DistriBeats catalogue) *	Electronic/House	Loaded live from GET /catalogue.
Language *	English	Loaded live from GET /catalogue (54 languages).
Release date *	Pick a date >= 9 days from today	Enforces server minimum lead time (9 calendar days).
Original release date (optional)	Leave blank	Optional back-catalog date.
UPC / EAN (optional)	123456789012 (or leave blank)	Must be 12-14 digits if entered.
Copyright owner (cLine) *	2026 HoodBoy Entertainment	Required. Mapped to cLine ("2026 HoodBoy Entertainment").
Publishing / Master owner (pLine)	2026 HoodBoy Entertainment	Mapped to pLine. Defaults to cLine owner if blank.
Catalog number (optional)	HBE-TEST-001	Optional internal label catalog code.
Spotify artist URL	Leave blank (or valid Spotify URL)	Blank sets newSpotifyArtist: true automatically.
Artwork AI usage	None	Artwork AI declaration.
AI rights PDF URL	Leave blank (when AI is None)	Only required when a track uses Partial/Full AI.
Cover artwork *	Upload ANY image (auto-adjusted to 3000x3000 RGB) or click "Auto-Generate 3000x3000 Cover"	Auto-scales/crops any image to 3000x3000 px RGB JPG/PNG.
Release contains explicit content	Unchecked (or Checked)	Boolean flag.
I confirm the artist meets minimum age *	CHECK THIS BOX	Required attestation (attestations.age = true).
I confirm all distribution & master rights *	CHECK THIS BOX	Required attestation (attestations.rights = true).

Fill out Section 2 & Section 3: "2. STORES" and "3. TERRITORIES (ISO 3166-1)":

Section / Control	What to Click / Select	Behavior
2. Stores	Click "All General (32)" or check Spotify, Apple Music, YouTube Music	Searchable multi-select from GET /catalogue. Unavailable stores (Beatport, Traxsource) are excluded.
3. Territories (ISO 3166-1)	Keep "Worldwide" active (optionally check any country to exclude)	Supports Worldwide + Excluded ISO codes, or "Specific Territories" inclusion list.

5. Section 4: Complete Per-Track Form (Track 1 Fields)

Scroll down to "4. TRACKS (1)" and fill in every field on Track 1 as follows:

Track 1 Field Label	What to Enter / Select	Validation Rule Tested
Track title *	Midnight Horizon	Must match Release Title because Release Type is Single.
Version	Original	Optional version (e.g. Radio Edit, Club Mix).
ISRC (optional, 12 chars)	USRC17607839 (or leave blank)	Validated against ^[A-Z]{2}[A-Z0-9]{3}\d{7}$.
ISWC (optional)	T-034.524.680-1 (or leave blank)	Validated against ^T-?\d{3}\.?\d{3}\.?\d{3}-?\d$.
Language *	English	From GET /catalogue languages.
Composition type *	Original	Original or Cover (from GET /catalogue).
Recording rights *	Original	Original or Licensed (from GET /catalogue).
AI usage *	None	None, Partial, or Full (from GET /catalogue).
Composers (full legal names) *	Aarav Sen	Required full legal name(s), comma-separated.
Writers / Lyricists *	Riya Kapoor	Required unless "Instrumental" checkbox is checked.
Producers *	Kiran Rao	Required producer name(s).
Mixing engineers *	Dev Malhotra	Required mixing engineer legal name(s).
Mastering engineers *	Meera Nair	Required mastering engineer legal name(s).
Featured artists (optional)	Leave blank (or Zoya Khan)	Optional comma-separated featured artists.
Performers & Roles *	Name: Aarav Sen | Role: Lead Vocals	At least 1 performer with a DistriBeats performerRole.
Master audio file *	Click "Generate Sample WAV" (or choose sample-track.wav)	Accepts WAV or FLAC only. Rejects MP3/M4A/AIFF.
Preview start (m:ss, optional)	0:01 (or leave blank)	Must match m:ss format and be < track duration.
Duration (seconds, optional)	2	Track duration in seconds.
Explicit lyrics / Instrumental	Leave both unchecked	Toggles explicit & instrumental rules.

6. Save Draft, Edit Draft Safely, Approve QC & Submit to DistriBeats (TEST)

Click 1 (Save): Click the purple "Save Release Draft" button at the bottom-right of the form. You will see the toast: "Distribution draft created" and return to the Catalog tab.

Click 2 (Safe Edit): In the Catalog table, click "Edit" on your draft row. Verify that every field, credit, performer role, store, territory, cover art ("Saved cover: ..."), and audio file ("Saved audio preserved: ...") is restored without data loss. Click "Update Release Draft".

Click 3 (Admin QC): Notice the Submit button is disabled until Content/QC passes. Click the "Admin QC" tab at the top of the Distribution page.

Click 4 (Approve): In the Content & QC Review Dashboard table, find "Midnight Horizon" and click the green "Approve" button. You will see the toast "Approved".

Click 5 (Submit): Click the "Catalog" tab (or click "Details" on the release). The purple "Submit" / "Submit (TEST)" button is now enabled. Click "Submit".

Verify Result: The backend validates the release and mapped payload, creates the release on DistriBeats TEST API, uploads the 3000x3000 PNG cover and WAV file, and updates the status to "submitted".

7. Conditional Validation & Edge-Case Test Checklist

Use this checklist on the "New Release" form to verify that every conditional rule and negative validation check works as expected:

Test Case	What to Do in the Form	Expected Result
1. Instrumental Track	Check "Instrumental (no vocals / writers not required)" at the bottom of Track 1, and clear "Writers / Lyricists".	The Writers input disables automatically and saving succeeds without requiring writers.
2. Cover Song Rights Proof	Change "Composition type" on Track 1 to "Cover". Leave "HTTPS Rights-Proof URL" blank and click Save.	An amber box "HTTPS Rights-Proof URL *" appears. Saving with it blank fails; entering https://example.com/license.pdf passes.
3. Licensed Recording Proof	Change "Recording rights" on Track 1 to "Licensed".	Requires a valid https:// Rights-Proof URL before saving/submitting.
4. AI Track + PDF Requirement	Change "AI usage" on Track 1 to "Partial" or "Full". Leave "AI rights PDF URL" in Section 1 blank and click Save.	Fails with field error on aiDocumentUrl. Entering https://example.com/ai-rights.pdf passes.
5. AI Track Blocks YouTube Content ID	Check "YouTube Content ID" under Stores, then set Track 1 "AI usage" to "Partial".	"YouTube Content ID" is automatically deselected with an info toast and disabled while AI is Partial/Full.
6. Single Title Mismatch	Set Release Type to "Single", Release Title to "Song A", and Track 1 Title to "Song B". Click Save.	Blocked with error: "For a Single, the track title must match the release title."
7. Multi-Track EP with Different Credits	Change Release Type to "EP", click "+ Add Track", and enter different Composers/Writers/Producers/Performers on Track 1 and Track 2.	Both tracks save and map their own independent credits and performer roles.
8. Reject MP3 / Wrong Cover Size	Try selecting an .mp3 audio file or a cover image that is not 3000x3000 px.	Immediately rejected with a clear red error message in both the browser and the backend.
9. Release Date Lead Time	Try entering today's date in "Release date *".	Blocked with error stating release date must be at least 9 calendar days from today.

8. Testing Webhooks & Provider Catalogue (Admin Tabs)

Provider Catalogue: Click the "Provider Catalogue" tab on the Distribution page and click "Refresh" to view all test releases stored in your DistriBeats TEST account and see whether each is linked locally.

Webhook History: Click the "Webhook History" tab to inspect incoming signed webhook events (release.submitted, release.approved, release.rejected, release.store_live) from DistriBeats in real time.
