HoodBoy Entertainment — DistriBeats Testing Guide

Complete Click-by-Click & Field-by-Field Walkthrough for Distribution Form & Sandbox API

SAFE TEST MODE (db_test_) API: https://distribeats.com/api/public/v1

SECTION 1: PRE-FLIGHT VERIFICATION (CONFIRM TEST MODE & CONNECTION)

Follow these steps first to confirm your dashboard is connected to the DistriBeats Sandbox API.

Step	Where to Click / Target	Exact Action & Expected Result
Step 1.1	**Login Screen (https://hbe.lol)**	Sign in with your System Administrator (Admin) account.
Step 1.2	**Left Sidebar -> Distribution**	Under the CATALOG group in the left navigation menu, click "Distribution".
Step 1.3	**Top Page Header Badge**	Verify the amber badge next to "Distribution" reads: "TEST MODE (db_test_)".
Step 1.4	**Top-Right Status Pills**	Verify both status pills are green: "Live Socket" and "DistriBeats connected (TEST)".
Step 1.5	**Left Sidebar -> Artists**	Ensure at least 1 Artist exists (e.g., Stage Name: "Aarav Sen"). If none exists, click "+ Add Artist" and save one.

How TEST Mode Safety Works

Your backend is configured with a db_test_ API key. Every release you create and submit in this guide goes strictly to the DistriBeats Sandbox/Test environment. No real DSP stores (Spotify, Apple Music, etc.) receive live audio, and live API keys (db_live_) are automatically blocked by server policy.

SECTION 2: COVER ARTWORK AUTO-ADJUSTER & 1-CLICK TEST ASSET GENERATORS

DistriBeats requires 3000x3000 px RGB JPG/PNG cover artwork and WAV/FLAC audio. You have three easy ways to supply valid media:

Step	Where to Click / Target	Exact Action & Expected Result
Option A	**Upload Any Image (Auto-Adjust)**	Select ANY image file (e.g. 500x500, 1080x1080, 1920x1080) in the Cover Artwork field. The form automatically center-crops and converts it to an exact 3000x3000 px RGB JPEG and shows: "Auto-adjusted <W>x<H> px -> 3000x3000 px RGB".
Option B	**1-Click In-App Generators**	In TEST MODE, click "Auto-Generate 3000x3000 Cover" above the Cover Artwork input and click "Generate Sample WAV" above the Master Audio input to create and attach valid test files in one click.
Option C	**Pre-built Files in Project Folder**	Use the ready-made files in your repo folder: "test-assets/sample-cover-3000x3000.png" (3000x3000 RGB PNG) and "test-assets/sample-track.wav" (44.1 kHz 16-bit Stereo WAV).

SECTION 3: OPEN THE NEW RELEASE FORM & OPTIONAL MUSIC CATALOG IMPORT

Start a new release draft or prefill from an existing song in your Music Catalog.

Step	Where to Click / Target	Exact Action & Expected Result
Step 3.1	**Distribution -> "+ New Release"**	Click the purple "+ New Release" button (top right) or click the "New Release" tab.
Step 3.2 (Optional)	**Top-Right Dropdown: "Import track from Music Catalog..."**	Select any existing catalog song and click "Prefill from Catalog". This imports title, ISRC, ISWC, UPC, genre, language, writers, composers, producers, engineers, featured artists, and HTTPS rights URLs without modifying the original song record.

SECTION 4: FILL SECTION 1 — RELEASE METADATA & RIGHTS

Enter or verify the following values in "1. RELEASE METADATA & RIGHTS":

Section 1 Field Label	Exact Test Value to Enter / Select	Provider Rule & Behavior
Release title *	Midnight Horizon	Required (max 120 chars). Automatically syncs Track 1 title when Release Type is Single.
Primary artist *	Select your artist (e.g., Aarav Sen)	Required. Links the release to the Artist record.
Release type *	Single	From GET /catalogue (Single = 1 track, EP, Album).
Genre (DistriBeats catalogue) *	Electronic	Loaded dynamically from GET /catalogue (122 genres).
Sub-genre (DistriBeats catalogue) *	Electronic/House	Loaded dynamically from GET /catalogue.
Language *	English	Loaded dynamically from GET /catalogue (54 languages).
Release date *	Pick a date at least 9 days in the future	Enforces server-side minimum lead time (default 9 calendar days).
Original release date (optional)	Leave blank	Optional back-catalog original release date.
UPC / EAN (optional)	123456789012 (or leave blank)	Must be 12 to 14 digits if provided; leave blank for auto-assignment.
Copyright owner (cLine) *	2026 HoodBoy Entertainment	Required. Formatted into provider cLine ("2026 HoodBoy Entertainment").
Publishing / Master owner (pLine)	2026 HoodBoy Entertainment	Formatted into provider pLine. Defaults to cLine owner if left blank.
Catalog number (optional)	HBE-TEST-001	Optional internal label catalog number.
Spotify artist URL	Leave blank (or https://open.spotify.com/artist/...)	Leaving blank sets newSpotifyArtist: true on the provider payload.
Artwork AI usage	None	Declares AI usage on cover art.
AI rights PDF URL	Leave blank (when AI usage is None)	Required (https://...pdf) only when any track uses Partial or Full AI.
Cover artwork *	Click "Auto-Generate 3000x3000 Cover" or upload any image	Any uploaded image is auto-adjusted to 3000x3000 px RGB JPG/PNG.
Release contains explicit content	Leave unchecked (or check if explicit)	Sets release-level explicit flag.
Confirm artist minimum age *	CHECK THIS BOX	Required provider attestation (attestations.age = true).

Section 1 Field Label	Exact Test Value to Enter / Select	Provider Rule & Behavior
Confirm distribution & master rights *	CHECK THIS BOX	Required provider attestation (attestations.rights = true).

SECTION 5: FILL SECTION 2 (STORES) & SECTION 3 (TERRITORIES ISO 3166-1)

Configure where your release will be delivered using provider-controlled options:

Section 2 & 3 Control	Exact Test Value to Enter / Select	Provider Rule & Behavior
2. Stores (Searchable Multi-Select) *	Click "All General (32)" or check Spotify, Apple Music, YouTube Music	Populated from GET /catalogue. Unavailable stores (Beatport, Traxsource) are blocked. YouTube Content ID is auto-disabled if AI is used.
3. Territories (ISO 3166-1)	Keep "Worldwide" active (optionally check any ISO country to exclude)	Supports Worldwide distribution with Excluded Territories, or "Specific Territories" with ISO 3166-1 alpha-2 inclusion codes.

SECTION 6: FILL SECTION 4 — COMPLETE PER-TRACK FORM (TRACK 1)

Scroll to "4. TRACKS (1)" and fill in every track-level field as shown below:

Track 1 Field Label	Exact Test Value to Enter / Select	Provider Rule & Behavior
Track title *	Midnight Horizon	Must match the Release Title when Release Type is Single.
Version	Original	Optional mix/version name (e.g., Original, Radio Edit, Extended Mix).
ISRC (optional, 12 chars)	USRC17607839 (or leave blank)	Validated against standard 12-character ISRC format.
ISWC (optional)	T-034.524.680-1 (or leave blank)	Validated against standard ISWC format (T-123.456.789-0).
Language *	English	Track vocal language from GET /catalogue.
Composition type *	Original	Original or Cover (from GET /catalogue).
Recording rights *	Original	Original or Licensed (from GET /catalogue).
AI usage *	None	None, Partial, or Full (from GET /catalogue).
Composers (full legal names) *	Aarav Sen	Required full legal name(s), comma-separated.
Writers / Lyricists *	Riya Kapoor	Required full legal name(s) unless "Instrumental" is checked.
Producers *	Kiran Rao	Required producer name(s), comma-separated.
Mixing engineers *	Dev Malhotra	Required mixing engineer full legal name(s).
Mastering engineers *	Meera Nair	Required mastering engineer full legal name(s).
Featured artists (optional)	Leave blank (or Zoya Khan)	Optional comma-separated featured artist names.
Performers & Roles *	Name: Aarav Sen | Role: Lead Vocals	Requires at least 1 performer using an official DistriBeats performerRole.
Master audio file (WAV / FLAC) *	Click "Generate Sample WAV" (or upload .wav / .flac)	Accepts WAV or FLAC only (up to provider byte limit). Rejects MP3, M4A, AIFF.
Preview start (m:ss, optional)	0:01 (or leave blank)	Must be formatted as m:ss and be less than track duration.
Duration (seconds, optional)	3	Track length in seconds.

Track 1 Field Label	Exact Test Value to Enter / Select	Provider Rule & Behavior
Explicit lyrics / Instrumental	Leave both unchecked	Check "Instrumental" only for non-vocal tracks (makes Writers optional).

SECTION 7: SAVE DRAFT, SAFE DRAFT EDIT, ADMIN QC APPROVAL & SUBMIT (TEST)

Execute the complete end-to-end submission lifecycle:

Step	Where to Click / Target	Exact Action & Expected Result
Step 7.1	**Bottom-Right: "Save Release Draft"**	Click the purple "Save Release Draft" button. The draft is validated and saved, returning you to the "Catalog" tab with status "draft".
Step 7.2	**Catalog Row -> "Edit" Button**	Click "Edit" on your draft row. Verify that every field, credit, performer role, store, territory, cover art ("Saved cover..."), and audio file ("Saved audio preserved...") is restored with zero data loss. Click "Update Release Draft".
Step 7.3	**Top Tab Bar -> "Admin QC"**	Notice the "Submit" button is locked until QC passes. Click the "Admin QC" tab, find "Midnight Horizon", and click the green "Approve" button.
Step 7.4	**Catalog Row -> "Submit" (or Details -> "Submit (TEST)")**	Return to the "Catalog" tab (or click "Details"). Click the purple "Submit" button. The backend maps the payload, validates it against the OpenAPI schema, creates the test release on DistriBeats, uploads the cover & WAV audio, and transitions the status to "submitted".
Step 7.5	**Tabs: "Provider Catalogue" & "Webhook History"**	Click "Provider Catalogue" -> "Refresh" to see your test release returned live from DistriBeats. Click "Webhook History" to inspect signed webhook events.

SECTION 8: CONDITIONAL VALIDATION & EDGE-CASE TEST MATRIX

Use these quick checks on the New Release form to verify every conditional validation rule:

Scenario to Test	Exact Test Value to Enter / Select	Provider Rule & Behavior
1. Instrumental Track	Check "Instrumental" on Track 1 and clear "Writers / Lyricists"	Writers field disables automatically and the draft saves/submits without requiring writers.
2. Cover Song Rights Proof	Set Track 1 Composition type = "Cover"	Amber "HTTPS Rights-Proof URL *" box appears. Leaving it blank fails; entering https://example.com/cover-license.pdf passes.
3. Licensed Recording Proof	Set Track 1 Recording rights = "Licensed"	Requires a valid https:// Rights-Proof URL before saving or submitting.
4. AI Track + PDF Document	Set Track 1 AI usage = "Partial" or "Full"	Requires "AI rights PDF URL" in Section 1 to be a valid https://...pdf link (e.g. https://example.com/ai-rights.pdf).
5. AI Blocks YouTube Content ID	Check "YouTube Content ID" in Stores, then set Track 1 AI usage = "Partial"	"YouTube Content ID" is automatically deselected and disabled while any track uses Partial or Full AI.
6. Single Title Matching	Set Release Type = "Single", Release Title = "Title A", Track 1 Title = "Title B"	Blocked with field error: "For a Single, the track title must match the release title."
7. Multi-Track EP Credits	Set Release Type = "EP", click "+ Add Track", enter distinct credits on Track 1 & 2	Each track saves and maps its own independent writers, composers, producers, engineers, and performers.
8. Reject MP3 / M4A / AIFF	Try selecting an .mp3, .m4a, or .aiff file in Master Audio	Immediately rejected with a field-level error in both frontend and backend.
9. Release Date Lead Time	Pick today's date in "Release date *"	Blocked with error requiring at least 9 calendar days lead time from today.
